Comments: 7 Written Comments as follows:

- *Print size on many slides was too small to read (on the screen).*

For an enlightened audience such as the one that shows up for such events, you would do well to enumerate in detail any statements or assumptions having to do with environmental benefits or costs and attempts to do a "full-service" environmental cost-benefit analysis of each alternative.

- *Email and web are good means of alerting public; however, asking Daily Progress or Cville Weekly may help increase public participation.*
- *Thanks.*
- *A negative presentation was given.*
- *The presentation indicates our community is faced with problems of space, cost, and environmental quality that need a total community response not limited to water supply by a restricted agency mandate.*
- *Where are the elected representatives?*
- *Thank you.*
