

RIVANNA WATER & SEWER AUTHORITY  
MEADOW CREEK INTERCEPTOR UPGRADE PROJECT

Greetings! We hope that the New Year finds you well. Rivanna Water & Sewer Authority is currently executing contract documents with Metra Industries, Inc., to begin the replacement of the Meadow Creek Sanitary Sewer Interceptor. We anticipate that construction will begin in late winter or early spring but have not received a formal schedule from the Contractor. Williamsburg Environmental Group is preparing the final landscape plans and bidding documents and the landscape project is anticipated to bid in the spring to coincide with the construction schedule of the sewer project. Rivanna is committed to keeping the community updated on the changes that will be taking place, as well as coordinate with home and business owners regarding any construction work that may have an impact on their daily life.

If you would like to receive emails regarding on-going construction work and progress updates, please email Candice Jones at [cjones@rivanna.org](mailto:cjones@rivanna.org) with your name and email address so that you may be placed on our notification list. Please also provide the neighborhood or street that you live in/on if you would like to receive neighborhood-specific information as it is applicable.

You may also check our website at [www.rivanna.org](http://www.rivanna.org) for project information on the “Meadow Creek Interceptor Project” page under “Projects and Reports” once construction is underway.

We would like to thank you in advance for your patience and cooperation on this project. Please feel free to contact Michelle Simpson, the Rivanna Project Manager at (434) 977-2970 x 202 if you have any other questions.
